Trend in Vacancy Rate (Comparison with Market Vacancy Rate)

Overall

Tokyo 23 Wards/Other Areas

Average Vacancy Rate Computation (e.g., to compute the average rate for the following 2 properties)

Properties owned by JRE	Leasable Space (m)	Property Vacancy Rates	Office Areas*	Vacancy Rates of Areas*
A Building	① 5,000	④ 3.0%	Area A	⑦ 4.0%
B Building	② 3,000	⑤ 6.0%	Area B	⑧ 8.0%
Total / Average	③ 8,000	⑥ 4.1%		⑨ 5.5%

$$⑥ = (① \times ④ + ② \times ⑤) / ③$$

$$⑨ = (① \times ⑦ + ② \times ⑧) / ③$$

* Average vacancy rate is calculated by Japan Real Estate Asset Management Co., Ltd. using the data obtained from CBRE K.K.

* The data of CBRE K.K. reflects all office building properties in all of the researched areas until June 2011, and thereafter to December 2012 reflects office building properties with total floor space of 500 tsubo or larger.

Data from January 2013 and thereafter applies new area grouping and reflects office building properties with total floor space of 1,000 tsubo or larger that is based on New Earthquake Resistance Standard.

* JRE's properties which are not located in the areas reflected in the above CBRE K.K. data are excluded from the average vacancy rate from January 2013.

Portfolio PML

1.8%

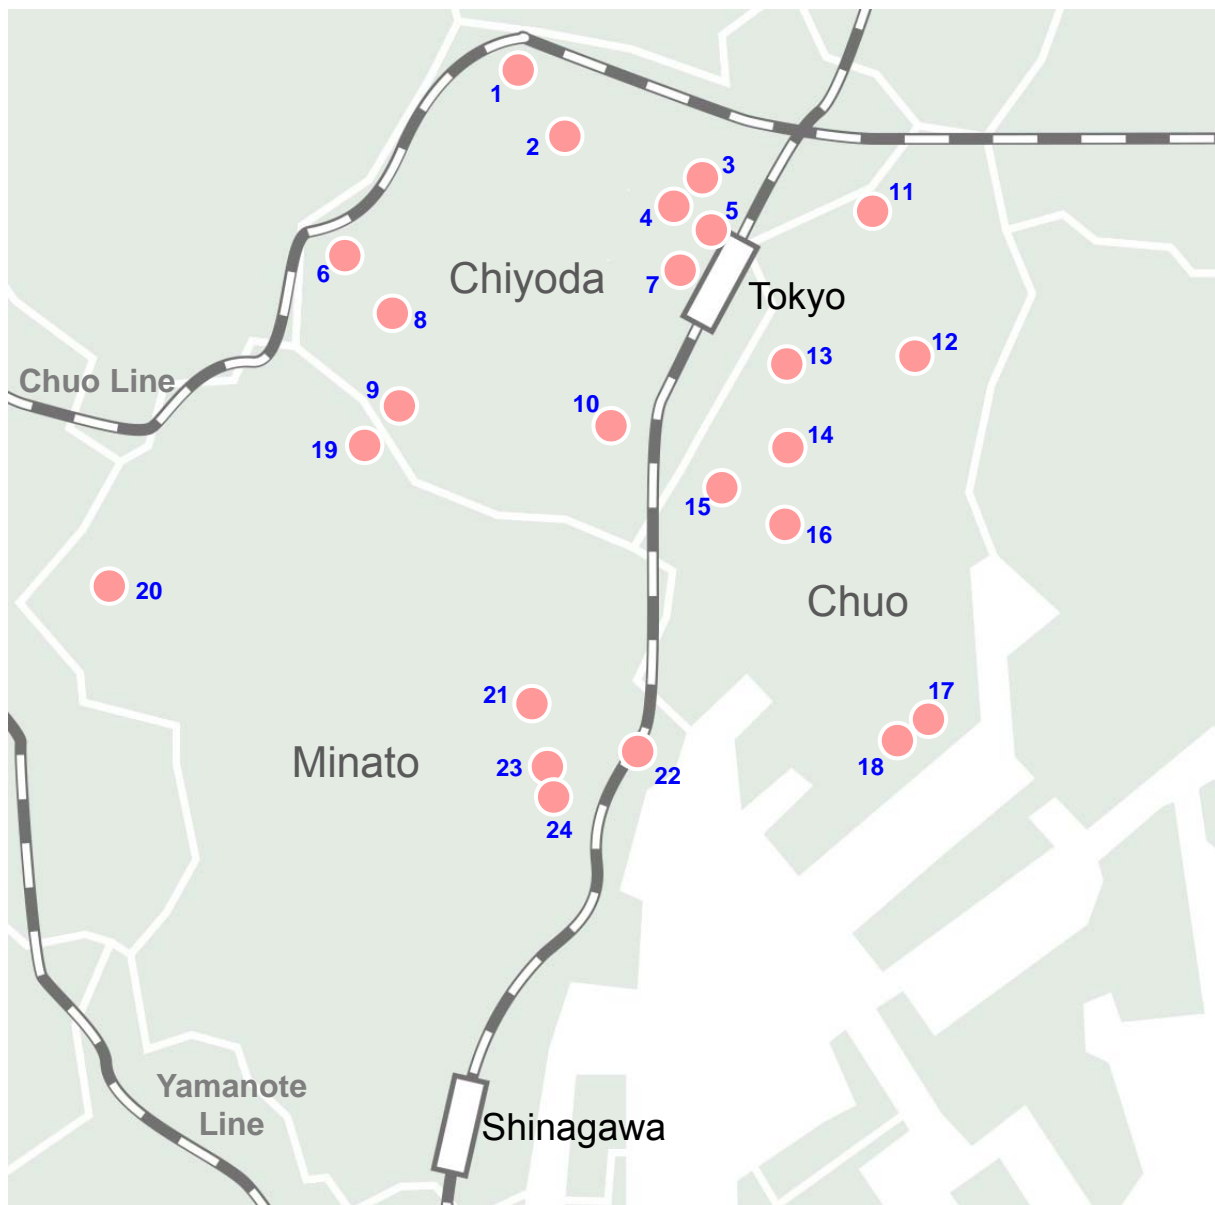

PML (Probable Maximum Loss) Value: Percentage of Probable Maximum Loss due to Earthquake

The percentage of the expense in restoring an earthquake-struck building to pre-earthquake condition to the total replacement value (i.e., total expense incurred from an earthquake divided by replacement value of a building), when assuming a catastrophic earthquake that is likely to occur with a 10% probability over a span of 50 years (a 10% probability of an earthquake occurring in 50 years can be translated into one occurring once in 475 years, which means an earthquake with a recurrence span of 475 years or one that might occur once in 475 years).

Structure and Past Record of Fees to Asset Management Company

Structure of Fees to Asset Management Company

Term fee

(As of September 30, 2016)

Each amount calculated in the following formula is based on the current cash flow (CF).

CF = Income or loss before income taxes + (Depreciation expenses and the amortization of deferred assets) -
(Gain or loss on sales and valuation of Specified Assets)

Furthermore, calculation of the term fee shall be based on the CF before deduction of the relevant term and incentive fees.

[Formula]*

For the portion of the CF that is not more than 2.5 billion yen, the amount equivalent to such portion is multiplied by 8.0%

For the portion of the CF that is more than 2.5 billion yen but not more than 4 billion yen, the amount equivalent to such portion is multiplied by 5.0%

For the portion of the CF that is more than 4 billion yen, the amount equivalent to such portion is multiplied by 3.0%

* Reduction in term-fee rates was agreed upon at the unitholders' meeting held on March 28, 2003. The new rates above apply from Sep. '03 Period.

Incentive fee

1. If (i) during the recent six (6) consecutive fiscal periods, including the relevant fiscal period, the CF per Unit for the fiscal period is equal to or larger than that of the previous fiscal period, and (ii) the CF per Unit for the relevant fiscal period with respect to when the incentive fee is calculated, increases from that in the previous fiscal period, the following formula applies:

[Formula]

([CF per Unit as of the last day of the relevant fiscal period] - [CF per Unit as of the last day of the immediately preceding fiscal period]) x (Total number of outstanding Units as of the last day of the relevant fiscal period) x 30.0%

2. If, although the requirement in (1) (i) above is not satisfied, such CF per Unit exceeds the arithmetic average of the CF per Unit during the recent six consecutive fiscal periods and the requirement in (1) (ii) above is satisfied, the following formula applies:

[Formula]

([CF per Unit as of the last day of the relevant fiscal period] - [Arithmetic average of the CF per Unit during the recent six fiscal periods, including the relevant fiscal period]) x (Total number of outstanding Units as of the last day of the relevant fiscal period) x 30.0%

CF per Unit shall be calculated by dividing the CF by the total number of outstanding Units as at the end of each fiscal period; provided, however, that if either of the below events come into force and the total number of outstanding Units increases or decreases during the recent six fiscal periods including the relevant fiscal period, in order to exclude the effects on CF per Unit by such increase or decrease in the number of Units, the figure of CF per Unit during the recent six consecutive fiscal periods shall be adjusted and calculated.

(i) Consolidation or Split of Units

(ii) Issuance of New Units upon Exercise of New Units Acquisition Rights concerning Allotment without Consideration for Unitholders

If the Investment Corporation acquires Own Units and holds Own Units that are not disposed or canceled as at the end of each fiscal period, the figure obtained by subtracting the number of Own Units held from the total number of outstanding Units as at the end of each fiscal period shall be deemed as the total number of outstanding Units as at the end of each fiscal period.
