Terms used in this report

- (1) All numerical data are expressed by rounding the numbers down to their respective units. Percentages, including those for occupancy rates, and interest-bearing debt/total assets ratio are rounded to the first decimal point.
- (2) The figures for "Leasable space," "Leased space," "Occupancy rate" and "Number of tenants" only refer to the portion of shares owned by Japan Real Estate Investment Corporation (JRE).
- (3) "Average occupancy rate" is calculated by dividing total leased space by total leasable space at the end of every month during the period.
- (4) "Leasable space" and "Leased space" do not include the area used for or leased as rental meeting rooms and maintenance/stock rooms.
- (5) The data pertaining to the residential portions are not included in "Leasable space," "Leased space," "Occupancy rate" and "Number of tenants" for "Kitanomaru Square," "Nibancho Garden," "Ebisu Neonato" and "Nishiki Park Building."
- (6) "Rent" means tenant rent for "Leasable space."
- (7) "The number of tenants" refers to those tenants with whom we have concluded lease agreements for leasable floor space of building. (It does not include tenants who are leasing space other than floor space of buildings, such as parking space or side signboards.)
- (8) "The number of tenants" is the number of sub-lessees in cases where a pass-through lease agreement (a type of agreement in which the rent charged to the lessee is linked to the rent to be collected from the sub-lessees) is signed with a property management company, etc.
- (9) The number of tenants for the entire portfolio is the gross number of tenants by building. (If the same tenant occupies multiple properties, such tenant is counted as multiple tenants.)
- (10) "Book value" includes construction in progress and leasehold rights, etc.
- (11) "Capital expenditure" represents capital expenditure for construction completed during the period. (excluding the expenses capitalized as construction in progress and as home furniture, the brokerage fees, etc. related to real estate acquisition, and incidental expenses of acquisition such as real-estate acquisition tax, which are reflected in the book value.) Extension work cost is not included in "Capital expenditure."
- (12) "Ratio of share of ownership" refers to: the share of co-ownership in the case of a building owned jointly with other owners; the share of common area as set forth in relevant documentation such as the rules on management of the building in the case of a compartmentalized building (including a building that shares compartmentalized building units with other owners); and the share of quasi co-ownership in the case of trust beneficiary rights owned jointly with other owners.
- (13) "Brokerage fees, etc." = brokerage fees in connection with lease contracts + incentive fees paid to the property management company for rent increase upon contract renewal
- (14) "Property-related revenues" = Rental revenues (rent income [including rent for residential portions], common service charges, income from parking spaces, and collected electricity charges, etc.) + Non-rental revenues (cancellation fees and other miscellaneous income)
- (15) "Gain on transfer of properties" = Gain on sale of properties + Gain on exchange of properties
- (16) The acquisition price for Ryoshin Ginza East Mirror Building (¥7,999,422,762) consists of the amount paid to acquire the building on March 15, 2005 (¥5,353,500,000), and the total amount spent to expand the property (¥2,645,922,762). The acquisition price for Jingumae Media Square Building, part of which was sold on October 30, 2009, is the initial amount paid to acquire the property.
- (17) "Sponsors" refers to the following three shareholders of Japan Real Estate Asset Management Co., Ltd. (J-Rea): Mitsubishi Estate Co., Ltd.; The Dai-ichi Life Insurance Company, Limited; and Mitsui & Co., Ltd.
- (18) Due to space limitations in the document, the abbreviated property name is reflected on certain pages. (The abbreviations are shown in the chart below.)

^{*} Information as of each fiscal period end

^{*} The initial forecast for the 18th Period means the 18th Period performance forecast announced on May 17, 2010, and for the 19th and 20th Periods, the 19th and 20th Period performance forecasts announced on November 16, 2010.

^{*} Assumptions for performance forecast

[•] Performance forecast is based on the 57 properties held as of March 31, 2011, the transfer of Takanawadai Building as of April 1, 2011 and the partition of the co-owned interest of the Mitsubishi UFJ Trust and Banking Building as of April 28, 2011.

[•] The risk of decreasing revenues due to return of leased space and reduced rent is assumed, in addition to the increases and decreases already confirmed.

[•] Vacant spaces due to termination of agreements will be leased gradually after a certain period of time.

[•] Net income for the 19th Period and for each following period takes into account income taxes, etc. on the asset retirement obligations and the depreciation of leasehold interest in the property with term leasehold interest (Osaki Front Tower).

Image of Growth

Aim at stable future dividends by shifting focus to "external-growth oriented operations," viewing the weak real estate market as an opportunity

<Market environment and growth strategy (image)>

Recession period in economy and real estate market

General market condition in recession period

- Weak corporate performance
- Cost saving trend among tenants (Leased space cutback, review of branch offices, rent reduction)
- Decline in market occupancy rate
- Decline in market rent
- Rise in expected yield of real estate
- Decline in real estate price

External-growth oriented operations

Internal Growth

- Maintain the occupancy rate
- Maintain unit rent
- Restrain rent reduction requests from existing tenants

External Growth

■ Acquire excellent properties those are suitable for long-term investment with attractive yield

Osaki Front Tower (acquired on February 1, 2011)

Boom period in economy and real estate market

General market condition in boom period

- Strong corporate performance
- Growing needs for leased space expansion from tenants
- Rise in market occupancy rate
- Increase in market rent
- Lowering in expected yield of real estate
- Increase in real estate price

Internal-growth oriented operations

Internal Growth

- ■Improve the occupancy rate
- ■Increase unit rent

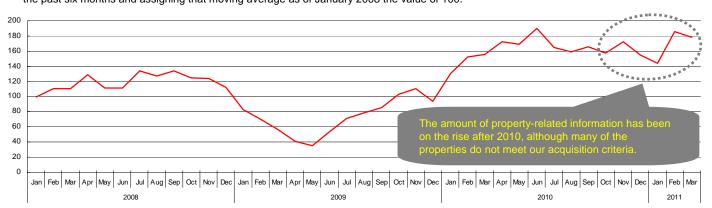

Rent increase negotiation with existing tenants Revise rents to be in line with market rent when new tenants move in

External Growth

- Careful acquisition of properties
- while avoiding overheated competition in the market
- Examine portfolio reshuffle (selling properties in the portfolio) to improve the quality of the portfolio
- February 2011 Acquisition of Osaki Front Tower
- March 2011 Acquisition of Kyodo Building (Kayabacho 2Chome)
 - → Aim at further external growth by leveraging sound financial position

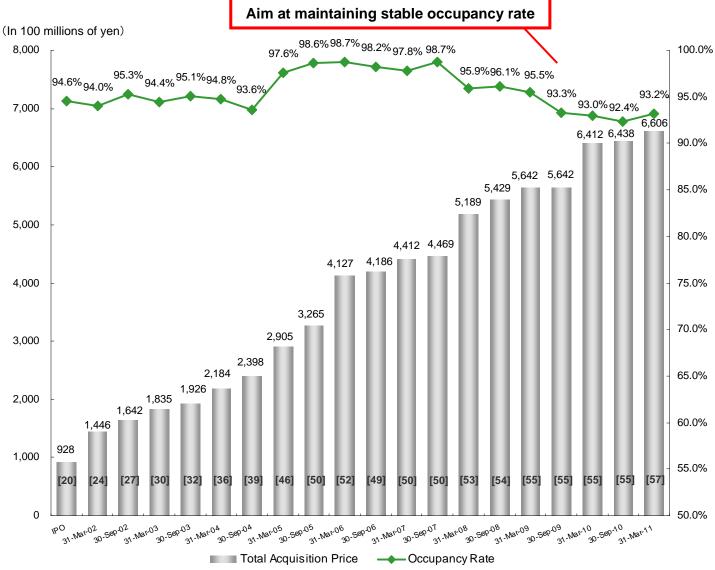

<Trends in property-related information obtained>

• The trend is based on an index calculated by obtaining the moving average for the amount of property-related information obtained over the past six months and assigning that moving average as of January 2008 the value of 100.

Management Policies

External Growth

Steady external growth with a focus on quality improvement

- Secure steady external growth by strengthening the collaboration with three sponsors
 - Try to acquire properties by negotiated transactions mainly with three sponsors
 - Work to diversify the property acquisition processes
- ■Continued efforts to strengthen portfolio quality
 - Acquire relatively new, large-scale competitive properties that generate stable revenues
 - Weigh the external environment and our financial standing in acquiring properties
 - Consider possibilities for reshuffling of assets that could strengthen the portfolio quality on a medium- to long-term basis by comprehensively examining lease market conditions, traffic convenience, and other factors

Internal Growth

Internal growth by our continuous efforts since IPO

- **■**Continue to hold stable occupancy rates
 - Proper awareness of tenant needs
 - •Implement a constructive leasing strategy to meet the characteristics of each building and changes in the market
- **■**Enhance rental incomes
 - Continuous efforts to maintain rent levels
 - Ongoing efforts to carry out the property management cost reduction plan
- **■**Enhance the value of properties
 - Conduct timely renovation work

Growth of Dividends

JRE was started in September 2001 as the first listed REIT in Japan, and marks its 10th anniversary this year. Over the past 10 years, we have experienced a variety of circumstances, not to mention the ups and downs of the market. However, whatever the state of the market, we have been trying to secure external growth with a strong focus on quality, attain internal growth through continuing efforts, and maintain a sound financial foundation. We will continue to maintain stable investment management to secure adequate dividends.

Financial Strategy

Sustain and enhance financial soundness

- Maintain conservative interest-bearing debt / total assets ratio and high credit ratings by strengthening the capital base
 - Build and keep debtholders' trust
 - Acquire a low-cost, and long-term fund raising capability
 - Secure flexibility in fundraising by limiting the covenants or other restrictive terms of financing
- Appropriate response to interest risk
 - Maintain conservative interest-bearing debt / total assets ratio (cruising speed of 30-40% level)
 - Lengthen the term of interest-bearing debt and stabilize the interest rate

■In the 17th Period (Mar-10), the transfer gain generated from the land condemnation of part of the Jingumae Media Square Building site is applicable for special tax deduction associated with land condemnation as prescribed under Article 65-2 of the Special Taxation Measures Law of Japan. Accordingly, JRE apportioned a certain amount of the unappropriated retained earnings at the end of the period to internal reserves within the limit of this special deduction (¥50 million) and to the extent which does not incur additional taxes such as corporate income tax or any related additional burden to our unitholders.

Following the above policy, JRE will pay dividends for the 19th Period in the amount of ¥7,652,066,400, which is the maximum integral multiple of 489,200—the number of units outstanding, within the amount of unappropriated retained earnings at the end of the period while securing the retained earning brought forward to the 20th Period.

- * ROA= Ordinary income / Average of total assets during the period
 - Average of total assets during the period is calculated as the average values of total assets at the beginning and end of the period.
- * ROE= Net income / Average of net assets during the period
 - Average of net assets during the period is calculated as the average values of net assets at the beginning and end of the period.

However, if the new units are issued during the period, the following formula is used to calculate the average, with the number of days from the beginning of the period to the day prior to the day of new unit issuance assumed to be A days and from the day of new unit issuance to the end of the period to be B days:

(Net assets at the beginning of the period x A days + net assets at the end of the period x B days)/operating days (A + B days).

- * EOP equity ratio = EOP net assets / EOP total assets
- * LTV (1) = EOP interest-bearing debt / EOP total assets
- * LTV (2) = EOP interest-bearing debt / (EOP interest-bearing debt + EOP unitholders' capital)
- * LTV (3) = EOP interest-bearing debt / EOP total property acquisition price
- * LTV (4) = EOP interest-bearing debt / EOP total property appraisal values determined by institutional appraisers

 (The appraisal value of the land adjacent to Ryoshin Ginza East Mirror Building is not included in the total property appraisal values at period-end up to the 17th Period.)
- * EOP long-term debt to capitalization = EOP fixed assets / (EOP long-term liabilities + EOP unitholders' capital)
- * DSCR = Net income before interest, taxes, depreciation and amortization / Interest expenses
- * NOI = Property-related revenues Property-related expenses (excluding Depreciation)
- * FFO = Net income + Depreciation Gain on transfer of properties Gain on transfer of development rights of floor area

(Comparison of Portfolio Rent vs Market Rent)

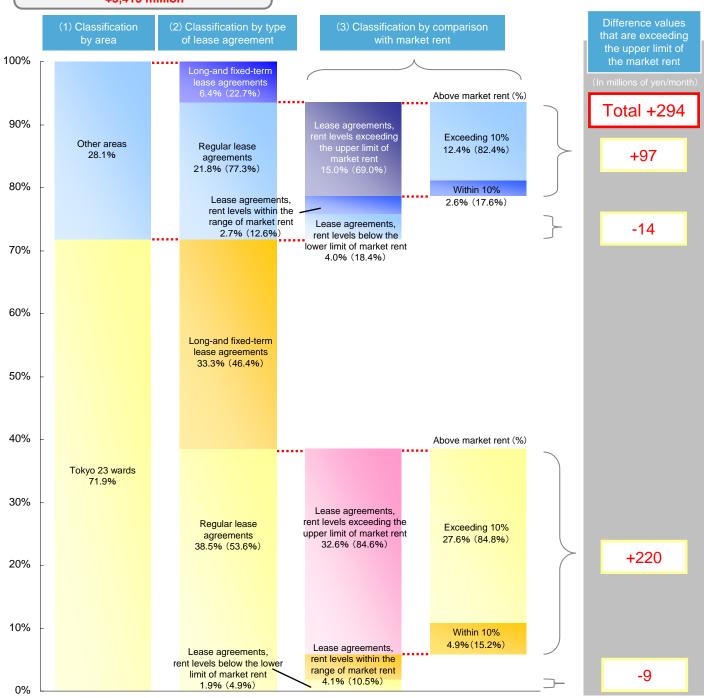

Classification of Lease Agreements

(Percentages represent the share of the entire portfolio. The numbers in parenthesis show the percentage of the share classified in the previous step.)

57 properties held as of March 31, 2011. The data is calculated on a monthly rent basis including common service charges.

Monthly rent in the entire portfolio, including common service charges

¥3,415 million

^{*}Long- and fixed-term lease agreements are contracts in which revenues are promised for a period of one year or longer from the end of the 19th Period.

*Regular lease agreements are contracts other than the long- and fixed-term lease agreements.

^{*}Lease agreements, rent levels within the range of market rent are contracts in which the rent level falls in the range of the upper and lower limits of the CBRE assessed rent. At the same time, lease agreements for special purposes, such as office space in the basement and machine rooms, etc., are included in this category.

Structure of Fees to Asset Management Company

Payment of Asset Management Fees to Asset Management Company

(As of March 31, 2011)

Term fee

Each amount calculated in the following formula is based on the current cash flow(CF).

CF = Income or loss before income taxes +(Depreciation expenses and the amortization of deferred assets)(Gain or loss on sales and valuation of the Specified Assets)

Furthermore, calculation of the term fee shall be based on the CF before deduction of the relevant term and incentive fees.

[Formula]^{*}

- •For the portion of the CF that is not more than 2.5 billion yen, the amount equivalent to such portion is multiplied by 8.0%
- •For the portion of the CF that is more than 2.5 billion yen but not more than 4 billion yen, the amount equivalent to such portion is multiplied by 5.0%
- •For the portion of the CF that is more than 4 billion yen, the amount equivalent to such portion is multiplied by 3.0%
- * Reduction in term-fee rates was agreed upon at the unitholders' meeting held on March 28, 2003. The new rates above apply from the 4th Period.

Incentive fee

1. If (i) during the recent six (6) consecutive fiscal periods, including the relevant fiscal period, the CF per Unit for the fiscal period is equal to or increases from that in the previous fiscal period, and (ii) the CF per Unit for the relevant fiscal period with respect to which the incentive fee is calculated increases from that in the previous fiscal period, the following formula applies:

[Formula]

- ([CF per Unit as of the last day of the relevant fiscal period] [CF per Unit as of the last day of the immediately preceding fiscal period])x(Total number of outstanding Units as of the last day of the relevant fiscal period)x 30.0%
- 2. If, although the requirement in(1) (i) above is not satisfied, such CF per Unit exceeds the arithmetic average of the CF per Unit during the recent six consecutive fiscal periods and the requirement in(1) (ii) above is satisfied, the following formula applies:

[Formula]

([CF per Unit as of the last day of the relevant fiscal period] – [Arithmetic average of the CF per Unit during the recent six fiscal periods, including the relevant fiscal period])x(Total number of outstanding Units as of the last day of the relevant fiscal period)x 30.0%

CF per Unit shall be calculated by dividing the CF by the total number of outstanding Units as of the end of each fiscal period. Furthermore, calculation of the incentive fee shall be based on the CF before deduction of any incentive fee.

Acquisition fee

In the case of acquisition of Real Estate Assets or other Specified Assets, an amount equivalent to the purchase price (excluding the consumption and local consumption taxes imposed on buildings) multiplied by a rate no higher than 0.5%*

'The structure of the acquisition fee was revised in accordance with a resolution passed at the unitholders' meeting held on March 17, 2009.

Transfer fee

In the case of transfer of Real Estate Assets or other Specified Assets, an amount equivalent to the sales price multiplied by a rate no higher than 0.5%

*PML(Probable Maximum Loss) Value: Percentage of Probable Maximum Loss due to Earthquake

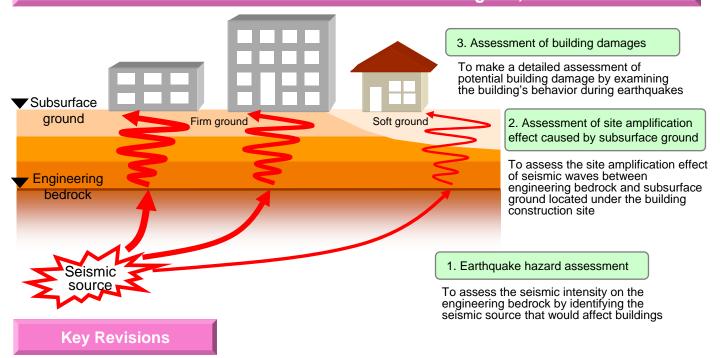

The percentage of the expense in restoring an earthquake-struck building to pre-earthquake condition to the total replacement value (i.e., total expense incurred from an earthquake divided by replacement value of a building), when assuming a catastrophic earthquake that is likely to occur with a 10% probability over a span of 50 years (a 10% probability of an earthquake occurring in 50 years can be translated into one occurring once in 475 years, which means an earthquake with a recurrence span of 475 years or one that might occur once in 475 years).

 $^{^{\}star}$ Takanawadai which was transferred on April 1, 2011 is not included here.

Earthquake Risk PML Assessment Approach

Earthquake Risk PML Assessment Approach Adopted at Tokio Marine & Nichido Risk Consulting Co., Ltd.

Renewal of the seismic source database

In addition to the existing seismic source database, information on seismic sources described in the "Probabilistic Seismic Hazard Map of Japan" (March 2006) issued by the Headquarters for Earthquake Research Promotion is now available, increasing the number of earthquakes that can be considered when conducting assessments. In the meantime, the urgency assessment is as of January 1, 2008.

Revision of the site amplification effect of the ground

An assessment through considering the frequencies at which the ground is susceptible to shaking during earthquakes (the ground's own natural frequency) becomes available by using the response spectral ratio of the engineering bedrock and surface layer as the index representing the site amplification effect caused by subsurface ground.

More sophisticated assessment of the behavior of buildings

A more sophisticated assessment of building behavior enables use of the response spectrum method to compare the building's performance against seismic hazard, thereby allowing resonance phenomenon, etc. to be considered.

Revision of building damages assessment

A more pragmatic assessment of the extent of damage to the building's components, including building frame, finishing, and facilities, becomes available by examining the building's behavior during earthquakes through two indices of "deformation" and "accelerated velocity."

Impact of the Great East Japan Earthquake

Earthquake-Resistance Standards

JRE observes the rule that any properties must meet the New Earthquake-Resistance Standards or equivalent strength and structure when acquiring a property. The PML value on earthquake risk analysis based on JRE's portfolio as of March 31, 2011 (*1) is 2.0%.

■ Characteristics of New Earthquake-Resistance Standards

- •Defining requirements for building design against two levels of earthquake
 - (1) Against medium-sized earthquakes (generally, intensity 5 lower): Secure safety of human lives, maintain building functions and protect the assets (no damage)
 - (2) Against large-sized earthquake (generally, intensity 6 lower 6 upper): Secure safety and protect human lives
- •Newly stipulating the required percentage of reinforcing steel hoops with the aim of ensuring sufficient thickness of steel hoops in reinforced concrete poles.
 - ⇒The value of strong earthquake protection was proven in the Great Hanshin Earthquake.

■PML(Probable Maximum Loss) Value

The PML value on earthquake risk analysis based on JRE's portfolio

Loss Ratio 2.0%

*PML(Probable Maximum Loss) Value: Percentage of Probable Maximum Loss due to Earthquake

The percentage of the expense in restoring an earthquake-struck building to pre-earthquake condition to the total replacement value (i.e. , total expense incurred from an earthquake divided by replacement value of a building), when assuming a catastrophic earthquake that is likely to occur with a 10% probability over a span of 50 years (a 10% probability of an earthquake occurring in 50 years can be translated into one occurring once in 475 years, which means an earthquake with a recurrence span of 475 years or one that might occur once in 475 years).

⇒Given the above approach and from a cost-effectiveness point of view, JRE does not currently insure against earthquakes.

Impact on Portfolio due to the Great East Japan Earthquake

■ Portfolio Diversification (*1)

| | | | Number of Properties | Acquisition Price (¥mIn) | Ratio |
|-------------------------------|--|---|-------------------------|--------------------------|--------|
| T-1 | Tokyo 23 | 3 Central Wards | 19 | 351,044 | 53.4% |
| Tokyo Metropolitan Area | Wards | Tokyo 23 Wards (excluding 3 Central Wards) | 15 | 151,953 | 23.1% |

| (six Tohoku | prefectures) | | (2) | (4,174) | (0.6%) |
| | Ov | erall | 56 | 657,863 | 100.0% |

The properties held in the six Tohoku prefectures account for approximately 0.6% of the total portfolio.

■Impact on Portfolio

The Great East Japan Earthquake caused some ceiling boards to fall and caused some cracks in interior/exterior walls in several properties held by JRE. However, there was no material damage to any of the buildings held by JRE, including the two properties in Sendai City (Jozenji Park Building and Sendai Honcho Honma Building) that would have had a serious impact on the status of operations.

⇒Restoration work is ongoing following the emergency response work against the damage incurred.

- •The estimated amount of work relevant to the damage from the earthquake disaster in the overall portfolio (39 properties among the total of 56 properties)•••¥281 million (*2)
- •Ratio of the estimated costs against the damages to the total acquisition price (¥657,863 million) •••Approx. 0.04%

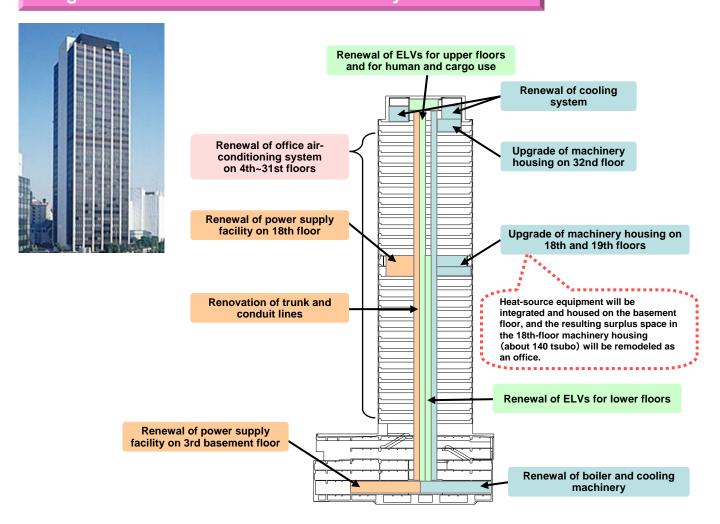

Posted as provision for loss on disaster in the 19th Period ended March 31, 2011 (*3)

- (Note 1) Excluding Takanawadai Building transferred as of April 1, 2011
- (Note 2) The figure represents the aggregation of estimated costs obtained as of April 21, 2011 and might change in the future.
- (Note 3) Accounting policy on provision for loss on disaster: Expensed the amount reasonably estimated at the end of the period among the costs of restoring the fixed properties damaged from the Great East Japan Earthquake to original condition.

Disclaimer on Forecasts

This presentation contains information regarding forecasts based on the plans and outlook of Japan Real Estate Investment Corporation (JRE). All data contained herein, other than those that describe current or historical data, are based on such forecasts. These forecasts are based on the assumptions, judgment, and data currently available from Japan Real Estate Asset Management (J-Rea) and JRE. These data may contain known and unknown risks, uncertainty, and other factors not accounted for. The forecasts herein may be affected by known and unknown risks, uncertainty, or other factors, particularly with respect to JRE's internal and external growth and profitability-per-unit targets. The aforementioned risks, uncertainty, and other factors may result in significantly different results regarding JRE's future performance, management, and financial data implicitly or explicitly presented herein. JRE shall assume no obligation to update or further disclose data regarding these forecasts after the date of this presentation (May 17, 2011).
